Professional Summary

Final-year Applied Bachelor's (D4) Informatics Engineering student at Politeknik Caltex Riau (GPA: 3.21/4.00, expected graduation: 2027) specializing in Full-Stack Web Development and Mobile Integration. Proven track record in developing high-performance interactive web interfaces using Next.js and GSAP animations, along with designing robust Python-based RESTful API services. Actively incorporates modern AI-assisted development workflows (Claude Code, OpenCode) and Large Language Model (LLM) integrations to accelerate feature delivery cycles. Experienced in collaborating across cross-functional engineering teams to build reliable, user-focused applications.

Technical Skills

Core Competencies	Next.js, TypeScript, JavaScript (ES6+), React.js, Tailwind CSS, Interactive Web Animation (GSAP ScrollTrigger, Framer Motion), RESTful API Integration, Git & GitHub
Backend & DB	Python (FastAPI, Flask), PostgreSQL, Supabase (Auth, Row Level Security), SQLite
AI & Workflow	AI-Assisted Development (Claude Code, OpenCode), LLM Function Calling, Multi-Model Routing, Vercel Deployment, Linux Environment Fundamentals
Familiar Tools	PHP (Laravel), Python (Django & Django REST Framework), Mobile Client Architecture

Featured Projects

Nov 2026 **Creator & Full-Stack Developer**, *Curated Workspace v1.0.0 – Interactive Portfolio Platform*, Live Demo

Tech Stack: Next.js 16, TypeScript, Supabase, GSAP, Lenis

- Developed a responsive web platform utilizing Next.js 16 with Partial Prerendering (PPR) to minimize page load times and streamline content transitions.
- Integrated GSAP ScrollTrigger and Lenis Smooth Scroll into a unified rendering loop, achieving smooth 60 FPS interactive animations.
- Secured database operations across Supabase PostgreSQL by implementing robust Row Level Security (RLS) policies to safeguard user data against unauthorized access.

2025–2026 **Backend & Machine Learning API Engineer**, *Product ML API – Backend Service & Mobile Team Collaboration*, GitHub Repo

Tech Stack: Python, FastAPI / Flask, ML Inference, JSON

- Designed and deployed a Python-based RESTful API backend serving real-time product classification inference directly to mobile client applications.
- Collaborated closely with mobile engineers to establish strict JSON schema contracts, validate incoming payloads, and standardize HTTP error-handling responses.
- Tuned request throughput and managed server memory overhead during high-concurrency inference workloads.

2025–2026 **Full-Stack & Applied ML Developer**, *Customer Purchase Category Prediction Platform*, GitHub Repo

Tech Stack: Python, Data Processing Pipeline, Scikit-Learn, Web UI

- Built a predictive analytics web application forecasting next-tier customer product preferences based on historical transaction datasets.
- Carried out feature engineering, evaluated multi-class classification models, and presented results through an intuitive, interactive visualization dashboard.

2026 **Full-Stack Web Developer**, *EduSummarize – Science Learning Text Summarization System*, GitHub Repo

Tech Stack: Python NLP, Web Platform, Responsive UI

- Developed an educational text-processing web app to automatically extract and condense dense scientific texts into concise, digestible study points.
- Crafted a clean, mobile-responsive user interface optimized across desktop and mobile devices to encourage self-paced learning.

2024–2025 **Web Developer**, *BesiTua Platform – Catalog System & Operational Digitization*, GitHub Repo

Tech Stack: Web Architecture, Database CRUD Engine, Search Filter

- Architected a web catalog and asset-tracking system to replace manual paperwork with structured digital inventory logs.
- Implemented fast keyword search, category filtering, and centralized item-status management modules.

Education

2023–Present **Bachelor of Applied Science (D4) in Informatics Engineering**, *Politeknik Caltex Riau (PCR)*, Pekanbaru, Riau, Indonesia, GPA: 3.21 / 4.00

Expected Graduation: 2027

- **Undergraduate Thesis:** "Development of Mobile Microlearning in Educational Applications Using the Octalysis Framework" – Integrating the 8 Core Drives of Octalysis gamification into microlearning modules on mobile platforms to improve user retention and motivation.
- **Academic Research (2026):** Collaborated on faculty research led by Rika Perdana Sari, S.T., M.Eng., assessing Technology Acceptance Model (TAM) dimensions and persuasive UI effectiveness through empirical testing with 50+ active participants.

Work & Business Operations Experience

2023–Present **Operations & Inventory Management Support**, *Maritime Rigging Hardware & Marine Equipment Supply (Family Business)*, Pekanbaru, Riau, Indonesia

- Oversee day-to-day logistics and supply chain workflows for maritime and heavy industrial rigging equipment (wire rope slings, alloy chains, anchors, chain blocks, and shackles).
- Maintain high inventory recording accuracy across warehouse logs and verify physical equipment specifications prior to delivery to industrial clients.
- Coordinate order fulfillment schedules to ensure consistent on-time shipments and client satisfaction.

Leadership & Community Involvement

2024 **Facilities & Infrastructure Division Member (Sarpras)**, *Informatics Engineering Student Association (ITSA) PCR*, Pekanbaru, Riau, Indonesia

- Supervised inventory, maintenance, and distribution of 50+ technical equipment units serving 300+ engineering students.
- Managed end-to-end technical logistics for 8 organizational programs throughout the academic term.

2023–2026 **Logistics, Public Relations, & Volunteer**, *Selected Committees & Community Outreach*, Pekanbaru, Riau, Indonesia

- **Event Logistics Coordinator (2024 & 2026):** Directed equipment procurement, distribution, and setup for UKM CTS General Assembly (2024) and PCR ITO Workshops (2024 & 2026).
- **Public Relations Officer – Official PCR TOEIC Examination (2024):** Managed candidate inquiries, registration protocols, and attendance verification for 250+ student test takers.
- **Educational Volunteer (June 2026):** Partnered with PCR community outreach teams to facilitate motivational sessions and interactive digital literacy workshops for 35+ children at a local orphanage.
